

## TASKTOP ENTERPRISE FOR IBM RATIONAL

*Reduce costs. Improve project visibility. Increase productivity.*

Interoperability between ALM solutions is critical for accurate project visibility and traceability. Tasktop delivers dramatic and measurable increases in development team's productivity through its highly intuitive task-focused interface, IDE integration, and broad ecosystem of ALM integrations. Tasktop Technologies provides open source (Mylyn) and commercial solutions (Tasktop Enterprise) for organizations that need seamless IDE integration with existing and future ALM stacks.

### QUICK FACTS

- Most Widely Used:** With over 1 Million downloads a month, Mylyn, is the de facto IDE integration and communication platform for enterprise development with Eclipse.
- Most Widely Integrated:** A majority of the Global 2000 use Tasktop's technology to provide a single point of interaction with over 60 of the most popular Agile and Application Lifecycle Management (ALM) systems.
- Strategic Alliances:** Nearly all leading Agile and ALM ISVs are Tasktop partners including deep relationships with HP for developer tooling, Microsoft for Windows 7 Eclipse integration and VMware for PAAS offerings.
- Thought Leadership:** IBM and Tasktop work closely to define the OSLC standards for ALM integration .

*"The reality is companies have multiple SCM tools, multiple change management tools, etc., and it's difficult to rip those out of organizations. They want integration across their toolset, and Mylyn is a good way to achieve that"*

**springsource®**  
A division of VMware®

**Adobe**

## MANAGER BENEFITS

- Provides unprecedented project status visibility
- Reduces cost by enabling interoperability across more than 60 ALM systems including:
  - HP ALM and Quality Center
  - Microsoft Team Foundation Server
  - Agile solutions e.g., Rally, VersionOne, etc.
  - Open source e.g., Hudson/Jenkins, Bugzilla
  - JIRA and many more...
- Produces a measurable 50% increase in productivity
- Enables accurate time tracking based on recorded actuals
- Facilitates communication in distributed team environments

## DEVELOPER BENEFITS

- Dramatically reduces time spent keeping ALM systems up to date without leaving the IDE
- Enables one-click multitasking and interruption recovery
- Eases adoption of Agile project management and defect tracking tools
- Makes communication around code and the sharing of expertise effortless
- Provides source code to task traceability

*"Tasktop has become the de facto integration layer between the Eclipse IDE and project management tools..."*
